

GET READY FOR BRITISH SCIENCE WEEK 2016

A celebration
of the best of
British science, technology, engineering and
maths – featuring fascinating, entertaining and
engaging events across the UK.

11–20
MARCH
2016

Register your
event now!
www.britishscienceweek.org/register

Grant funding available

Your organisation may be eligible for one or more of our grants:

- **A BSW Community Grant of £500 aimed to engage audiences who are traditionally underrepresented and currently not engaged in science activity**
- **A grant of up to £350, designed to help Scottish or Welsh organisations run an event as part of British Science Week.**

To find out more about our eligibility criteria and to apply, please visit www.britishscienceweek.org/funding

Grant applications will close on Monday 23 November 2015.

How to get involved

Visit the British Science Week website for loads of free resources – including inspiring case studies of previous events, as well as step-by-step instructions on how to organise your event, information about how to promote and publicise your activity, and advice on funding.

Our how-to guides contain information on running STEM events and activities on a small budget, and there are lots of handy templates to download as well as activity packs to give you event ideas to engage children of all ages and adults too.

You can also participate in British Science Week by taking part in citizen science activities... find out more overleaf!

Register now!

Once you have registered your event, it will be part of our online searchable programme for British Science Week. You can also request a free marketing pack (containing posters, postcards, balloons and stickers) to help you promote your activity.

Packs are limited and allocated on a first come, first served basis, so make sure you register your event early!

Turn bat detective

For British Science Week 2016, we are partnering with Zooniverse on the Bat Detective project. Bat Detective is a partnership between University College London, Zoological Society of London, The Bat Conservation Trust, BatLife Europe and University of Auckland.

Bat Detective is an audio visual citizen science project that asks people to identify bat calls. Humans are great at hearing and seeing the difference between a bat and a non-bat call, the different types of calls and what sequence a call belongs in. The Bat Detective project team needs your help to go through the sonograms and pick out the different calls.

We are aiming for 100,000 classifications during British Science Week 2016!

Find out more and get involved at www.britishscienceweek.org/batdetective

British Science Week (BSW) is the largest grassroots celebration of science, technology, engineering and maths in the UK, with activities taking place in schools, community groups and cultural institutions. In 2015, over 5,000 events took place across the country including special observations of the solar eclipse, debates on science policy issues, fairs and fetes in local communities, and much more.
